ABOUT US

Treston Security Services, established in 2017, uniquely integrates the concierge/protection model to deliver exceptional customer service in the security industry. Our team, comprising seasoned military veterans, law enforcement personnel, and former educators, is highly trained in security protocols and dedicated to memorable, positive interactions for our clients and their customers. We prioritize full commitment and attention to our clients' needs, ensuring they are both accommodated and protected.

We focus on recruiting and training development, driven by our motto, "We strive for your success." This commitment to innovation brings peace of mind to our clients. Our personalized approach emphasizes ownership, genuine relationships, and unparalleled service, leveraging cutting-edge technology and industry standards.

Collaboration is central to our strategy. We partner with federal and local law enforcement, enhancing our capabilities through alliances like InfraGard with the FBI/DHS. This equips us with advanced tools to combat cyber threats and fortify critical infrastructure.

Our leadership holds certifications such as Infrastructure Liaison Officer (ILO), Terrorism Liaison Officer (TLO), and Overseas Security Advisory Council (OSAC), contributing valuable insights to fusion center initiatives. With over 100 years of management experience, we are well-positioned to navigate complex security landscapes and uphold our proactive security stance.
